

eCARSHARING OSTTIROL

INSTRUCTION – VW ID3

Rental location: Raiffeisenbank Sillian

BEGIN YOUR FLUGS RIDE

Before you get into your booked FLUGS, check the car for defects. If you find something, you can report the defects in the APP.

In the event of serious damage, contact our hotline on 0800 66 55 24.

1. Open the vehicle

Via BLUETOOTH you can OPEN the VEHICLE directly via the APP, make a STOP (lock & lock) and END the BOOKING.

(If you have a FLUGS customer card, you can also use this RFID card to open the vehicle -> hold the card up to the telemetry system (on the driver's side below behind the windscreen). Wait for the signal (approx. 6 seconds) and then on the green light and the FLUGS unlocks.)

2. Disconnect the charging cable from the vehicle

Once the vehicle is unlocked, you can disconnect the charging cable (within 30 seconds). Please carefully place the charging cable at the charging point. The charging port is located on the right side at the rear.

3. For charging during your booking, you will find a Type 2 charging cable in the trunk.

A helpful tip for long journeys: If you are traveling longer distances, you will find a TIWAG charging card in the center console. You can use this card to charge at all TIWAG charging stations in the Tyrol and Carinthia region. Please return the charging card to the console after each use. You can find the locations of TIWAG charging stations using Google Maps or your vehicle's navigation system.

4. Drive off

Make yourself comfortable in FLUGS, put your right foot on the brake & press the the right of the steering wheel.

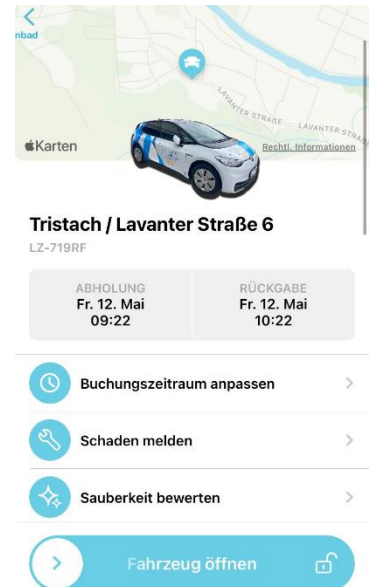

Then use the automatic lever (behind the steering wheel) to select the gear you want to engage.

D = DRIVE (forward gear)

N = NEUTRAL (idle)

R = RETOUR (reverse gear)

P = PARK (button on right side of shifter)

FLUGS eCarsharing

Lavanter Straße 6, 9907 Tristach, T. 04852/65835, www.flugs.info

Note: If you ever have problems logging in or starting the vehicle, just try again. Open the vehicle or make a stopover. Sometimes the MOBILE PHONE does not immediately find a Bluetooth connection. And another tip: stand close enough to the car so that the reception is better 😊

RETURNING THE FLUGS

1. Park the vehicle

Return the FLUGS to the rental location. Press the "P" (Park) button on the gearshift and then the "Start|Stop" button to turn off the vehicle.

2. Connect the charging cable

Please connect the vehicle to the charging station after each trip. A permanently installed charging cable is available at the Raiffeisenbank Sillian branch and is used for returns.

3. Activate or check charging

Hold the blue charging chip (located in the vehicle's center console) to the charging station (centered by the yellow dot). The charging station will light up blue, indicating that charging has been activated.

Then place the charging chip back in the center console.

4. Check charging activity: The display on the dashboard will now indicate that the vehicle is charging.

5. Lock the vehicle (in the app, select "End Booking").

You can also find the roadside assistance emergency number in the GLOVE COMPARTMENT (in the CASE with the registration certificate).

When reporting a breakdown, please license plate & chassis number (see registration document) ready.

!!! IMPORTANT NOTE !!!
Please do not open the BONNET!
NEVER TOUCH THE ORANGE WIRE ->
Electric shock hazard!
